

REMOTE DIAL THERMOMETERS

Offered in 2 ½", 3 ½" and 4 ½" dial sizes, these thermometers are furnished in four stainless steel case configurations for direct, surface or panel mounting. The following coding chart illustrates a wide variety of bulb styles, capillaries and process connection fittings. The versatility of configurations makes these thermometers well suited to a wide range of applications including hot and chilled water pipeline systems, tanks and air ducts.

'G45' GAS ACTUATED THERMOMETERS

Precision Instrument Company gas actuated thermometers combine mechanical instrument technology with reliable gas filled capillary tube and bulb assembly. The thermometer transmits temperature readings via expansion of the inert Gas used inside the bulb through the capillary and displaying the temperature on a dial type indicator. The result is a remote reading thermometer that requires no external power allowing temperature indication where it is convenient for the user.
